

Sujib Shrestha

WEB DEVELOPER

EDUCATION

- Bachelor In Information management (on-going)
- High school (Comp-Science)

OBJECTIVE

As a web developer (majorly front-end), my primary objective is to enhance digital experiences by building responsive, user-friendly, and visually appealing web applications that support seamless functionality.

SKILLS/TECHNOLOGIES

Front-End: React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

State Management: Redux, Context API

Version Control: Git, GitHub

Build & Tools: Vite, npm,

Backend: PHP, MySQL/MariaDB

PROJECTS

Movie Searching App

Technologies: ReactJS, Appwrite

Description: Built a dynamic movie search application where users can search for movies, view details, and filter results.

Blog App

Technologies: ReactJS, Appwrite

Description: Developed a blogging platform allowing users to create, edit, and delete posts.

Expense Tracker App

Technologies: ReactJS, PHP, MySQL

Description: Designed an expense tracker app to manage personal finances with categories, budgets, and analytics.
